# IntelliPad CRM from Versys Software, Inc.
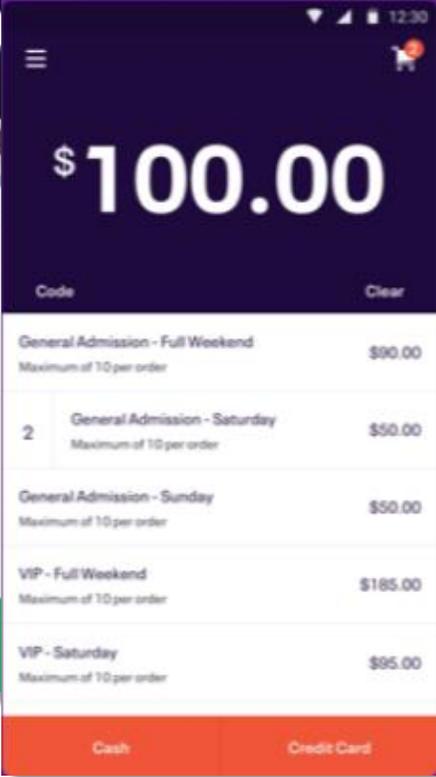

## *Eventbrite Ticketing and Attendance with IntelliPad Landing Pages*
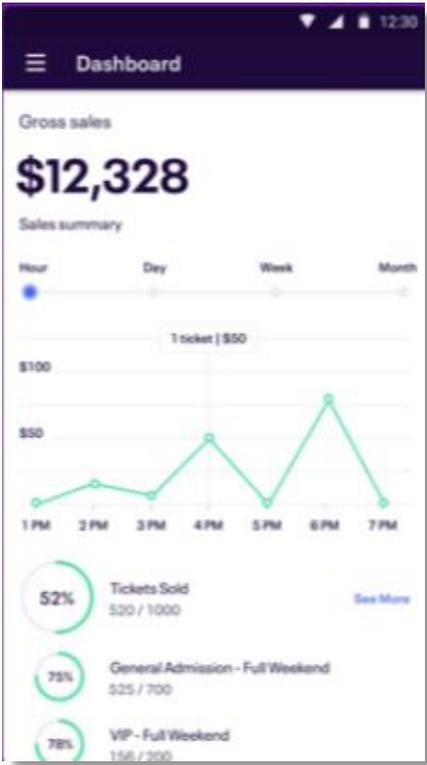

See the Eventbrite ticketing and check-in features at
https://www.eventbrite.com/organizer/overview/,
as partially shown below:

**Check-in at the door**

**Sell more at door**

**Keep your finger on the pulse**

In addition to simplifying the RSVP process with integrated Landing Pages, IntelliPad integrates with Eventbrite for a seamless ability to charge for events and automate attendance tracking.

When a contact either fills in their information or responds to an RSVP for an event and clicks the "Register" button on the firm's Landing Page, if the Event is linked to Eventbrite, an Eventbrite payment page is presented. Later, at the event with an Eventbrite Event Management app, attendees are efficiently checked in or can buy tickets. The ticket sales revenue flows to the firm's bank account. Refunds, if needed, can be authorized.

Ticketing can be done with or without charging for the event. After the event, a simple and quick export/import will update IntelliPad CRM with attendance and payment information.

## Information about Versys Software

Versys Software and its forerunner company Versys Corporation has a long history of providing high quality products, accompanied by full service to clients in the legal community.  Prior to focusing on the legal profession in 1985, the company developed professional billing software for the medical profession, full accounting and project management software for construction companies, and inventory and parts management for the auto dealership business.  This varied background provided the basis for the development of the Legal Insight billing, accounting, and practice management software – and more recently, the IntelliPad CRM software.

The company is headquartered in San Francisco. Between the San Francisco office and support offices in New Jersey, Massachusetts, South Dakota, and Arizona, Versys offers twelve hours of availability on all working days.  On-site and web-based consulting and training is available for new software installations and support services.  Our clients consistently report that our staff is friendly, capable, and responsive.
